

Introduction to Node.js servers

This is number 4 out of 5 marked weekly tasks

This is part of your assessment. It is worth up to 5%.

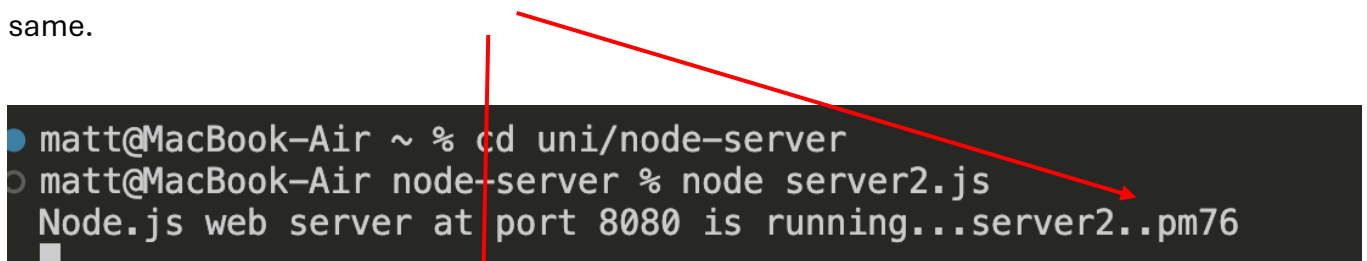

Below are the **6 screen shots you need to provide** for this week in your logbook.

Also there is one file to upload.

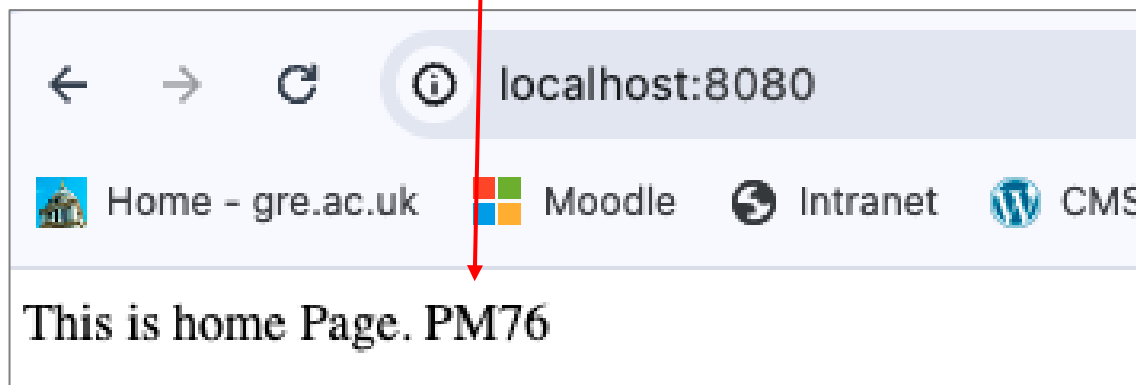

Screen shot 1 evidence that your file 'server.js' is running on port 8080

Please note I have put my username as an identifier in the first 2 screen shots, do the same.

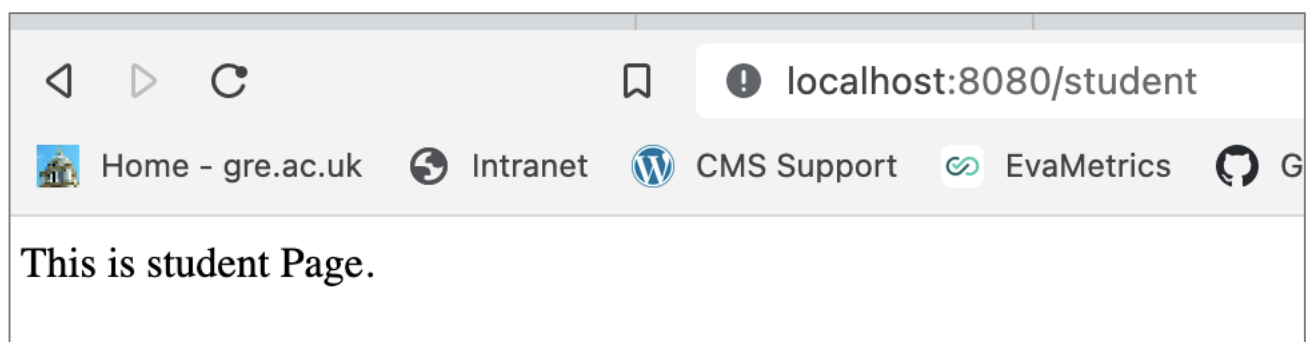

```
matt@MacBook-Air ~ % cd uni/node-server
matt@MacBook-Air node-server % node server2.js
Node.js web server at port 8080 is running...server2..pm76
```

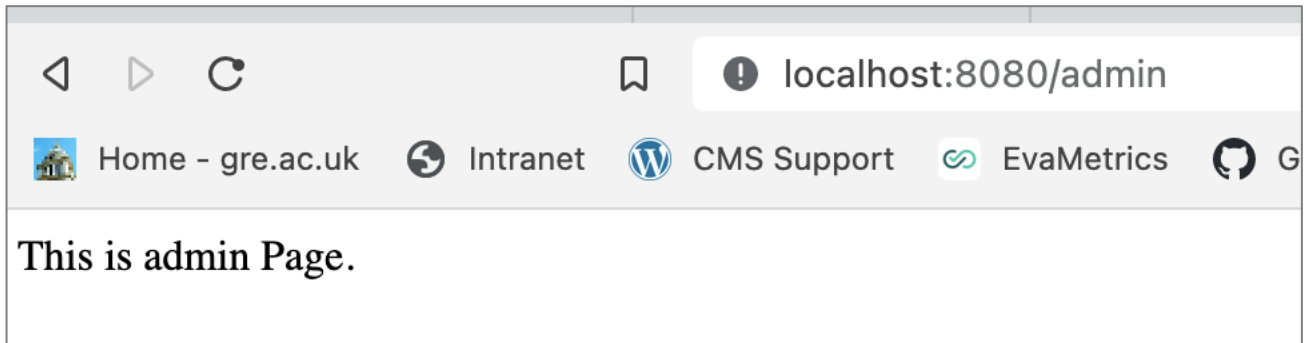

Screen shot 2

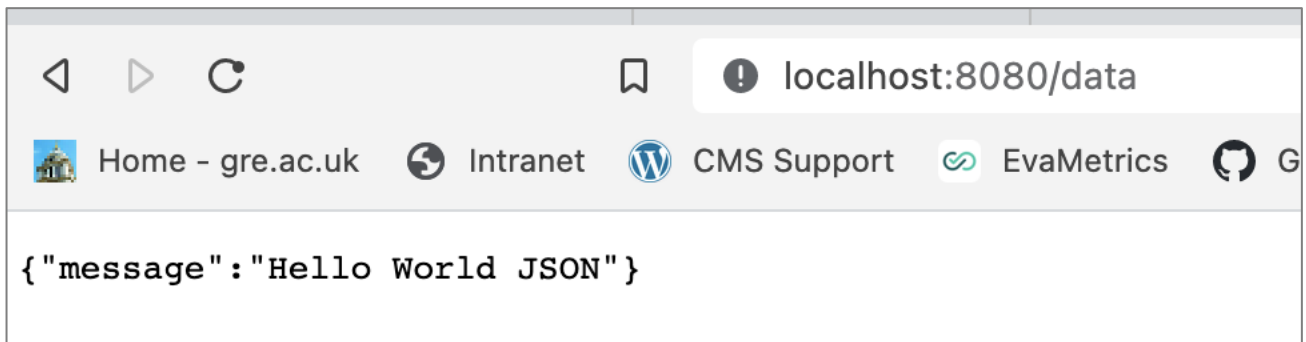

Screen shot 3

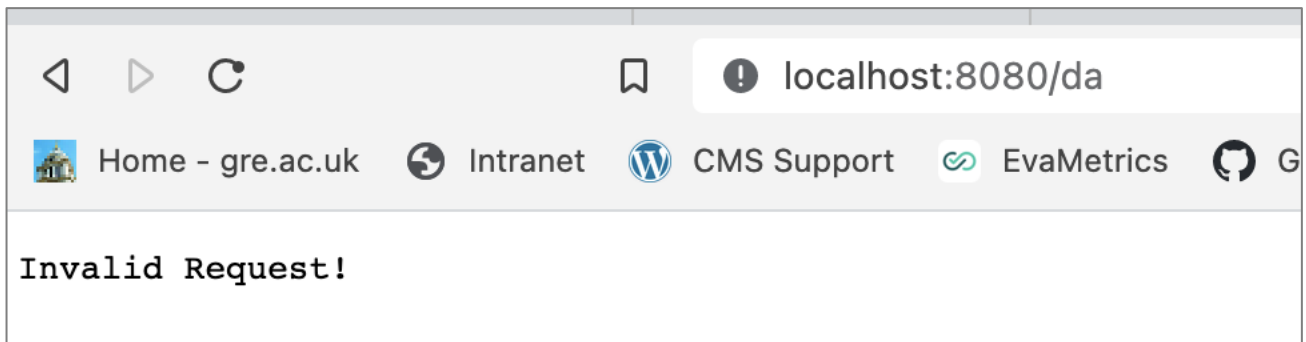

Screen shot 4

Screen shot 5

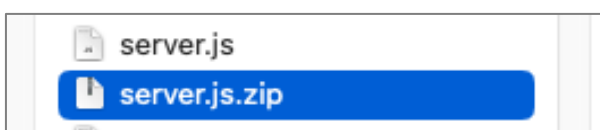

Screen shot 6

In addition to these 6 small screen shots provide brief annotations explaining **what you have understood** about Node.js servers.

When all this is finished zip the server.js file then rename the zip “week6” and upload it

When you have finished and uploaded this task begin working on the CRUD system in your own time.
